Trillium Court *update*

AN UPDATE ON THE WINDSOR-ESSEX PARKWAY
ACTIVITIES FOR RESIDENTS OF TRILLIUM COURT

Trillium Court's new location selected

With input from the River Park Board of Directors and the residents of Trillium Court the location of your new home has been selected within the Town of LaSalle. Your new home will be located approximately one kilometre away from your existing home. The chosen site was identified as "Site 1" in the previous newsletter.

The design of your new home has already begun and we will continue to work cooperatively with the River Park Board of Directors and the Town of LaSalle to ensure that all of your feedback that we have received is considered as part of the final design.

You can expect to see activities starting at this site early next year. Activities will include preparatory work needed to construct municipal services (sewer and water) and the new road network that will lead to the future Trillium Court.

New and Existing Trillium Court
October 19, 2010

Who's involved?

Many companies are involved in the relocation of Trillium Court. Here is a rundown of the main ones. These companies also have subcontractors that will be working with them during the development and construction of your new home.

Ministry of Transportation (MTO)

MTO is responsible for the delivery of The Windsor-Essex Parkway. As Trillium Court is required for construction of the Parkway, MTO is overseeing the relocation and construction of your home. As lead ministry, MTO, in partnership with the River Park Board of Directors, will review and approve all final plans and decisions.

Ontario Realty Corporation (ORC)

ORC provides customer-focused real estate services to the Ontario government, including strategic portfolio management, asset management, property and land management and capital projects. ORC is governed by a Board of Directors and accountable to the Ontario Minister of Infrastructure. ORC is working with MTO to deliver the relocation of Trillium Court.

MHPM Project Managers Incorporated

Since 1989, MHPM Project Managers have been providing strategic and project management services to the public and private sectors to ensure that investments are well spent. MHPM will be working with ORC as the project manager to assist in the construction of Trillium Court assuring that it stays on time and within budget.

Archon Architects Incorporated

Archon Architects Incorporated, celebrating its 20th year of business in Windsor, Ontario, is comprised of a team of highly motivated and dedicated professionals. Archon Architects is involved in commercial, institutional, educational and residential work. Archon will be the architect firm leading the design of the new Trillium Court.

TENANTS ADVISORY GROUP

To assist in the planning and design of the new Trillium Court, River Park Board of Directors provided a list of residents from Trillium Court that could represent the interests of a broad range of residents and provide feedback to the planning and design team. The following individuals will be working with the team in the design stages. Their feedback is valuable in ensuring residents' needs are included in the design of the new Trillium Court. Should you have any suggestions we encourage you to contact Elizabeth Switzer so she can share your suggestion with the advisory group and River Park Board of Directors on your behalf.

- Becky Bessem
- Keith & Edith Brown
- Evelyn Narsa
- Rick Seger
- Barbara Thomas
- Joyce Tyler
- Carolyn Williams

While the Tenants Advisory Group will provide valuable input, all final designs will require the approval and sign-off from River Park Board of Directors and MTO.
